Experience

Interned at Helvia (<https://helvia.ai/>) **3 months** full-time.

- Developed **Docker** workflows for **Kotlin**, **ReactJS**, 3 databases and **bash** scripts.
- Prototyped a **chat app** with letter-by-letter messaging using **Python**, **ReactJS**, **NextJS** and **MongoDB**. (<https://theodoros-d-alenas.site/key-mouth/>)

Collaborated in **7 team projects** in the University.

- Wrote Backend code in **SpringBoot** in 2 6-month projects. Used **Figma** and **PostgreSQL** as well.
- Used **C** and **C++** in 2 collaborative projects and multiple solo projects.
- Operated **4 Linux environments** from 2022 to 2024, 2 personal, 1 department's and 1 rented.

Projects

- Built a portfolio site using **PHP**, **HTML**, **CSS**, hosted on Vultr (www.vultr.com) with **Alpine Linux** + **NginX**.
- Experimented with **C**, **Makefiles**, **Python** and **Bash** on **Linux**.
- Practiced **TDD** (Kent Beck's method) and **CI/CD** techniques.
- Collaborated in **7 team projects** in the University, with unique and always active teams.
- **Empowered** and checked in on teammates. Willing to **file away** hard personal work.
